

A Research Study for Autistic Adults

Purpose of the Study: to investigate health experiences for autistic adults and adults on the autism spectrum

About the Research Study:

- Volunteers can earn \$25 for participating
- Volunteers will fill out a few online surveys and participate in a video call with a researcher
- Research activities will take place completely online
- Total time commitment is about 2 hours

Research Volunteers:

- Adults age 35 or older
- Identifies as having a diagnosis of an autism spectrum disorder
- Able to discuss health and healthcare with researchers
- We may also ask to talk to a friend or family member who helps you with your health or healthcare
